**Dr. Jian Zhang**

Finance, The University of Hong Kong, Pokfulam, Hong Kong SAR, China

**Dr. Xin Zou**

Finance, Hong Kong Baptist University, 224 Waterloo Rd, Kowloon Tong, Hong Kong SAR, China

Deadline for manuscript submissions:

**closed (31 January 2024)**

### Message from the Guest Editors

Households make environmental, social, and financial choices and decisions on a day-to-day basis. Traditional economic models usually focus on maximizing problems within one unit and one lifecycle, ignoring the needs of other units and future generations. Household sustainability is a new research field that aims to understand how households make environmental, social, and financial choices, and the interactions and influences across these three dimensions, to maximize their current utility without hurting the utility of future generations. Within the existing economic frameworks, household sustainability considers two additional fundamental issues: (1) concerns for the long-term growth (for descendants), and (2) constraints placed on human societies.

The Special Issue seeks research that provides insights on sustainable day-to-day actions of households as well as factors underlying households' choices. Both theoretical and empirical research papers related to the above topics are welcome. This Special Issue aims to offer a platform where all different topics may be presented to recompose the multi-faceted subject within the area of household sustainability.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPus](#) / [SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
