31 January 2022

Message from the Guest Editors

Human activities are continuing to be expansive, intrusive and multifarious, with huge impacts on the ecosystem. Species are impacted differently based on wide range of factors such as their characteristics, resilience and environment as well as the range, scale and nature of human activity.

Due to the increasing complexities and interrelations of human activities' impacts on the ecosystem, there is a need for evaluation of existing control measures and appraisal of detection, monitoring and remediation technologies to ascertain whether they are fit for purpose. These are required to be able to study the impacts of these human activities in the face of a growing number of environmental and climatic changes.

Hence, technical papers on investigations of fate and pathways of contaminants are welcome. We encourage authors to submit papers covering a wide range of topics on the impact of human induced changes in the ecosystem, including challenges and advances in the nature, scale, detection, monitoring, hydrology, restoration, remediation, and controlling of these activities and their impacts.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
