Message from the Guest Editors

Education using information and communication technologies has become a reality. For several decades, there has been a debate on the opportunities and threats resulting from the implementation of ICT in education.

The use of new media as didactic tools generates many unique implementations, allowing one to increase educational effects. The research on positive consequences related to the implementation of ICT is a strongly developing and prospective area on the edge of pedagogy, computer science, psychology, educational policy and sociology.

On the other hand, negative phenomena can be observed. These processes concern changes in the behaviour of individuals and groups, such as problematic use of the Internet: cyberbullying, sexting, copyright infringement and others. The dark sides of new technologies in education are analysed by researchers representing the risk paradigm of media pedagogy.

The aim of this Special Issue is to show both positive and negative consequences of the development of the information society. The Special Issue is part of current and key discussions on the sustainable development of the information society in the context of educational processes.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
