Message from the Guest Editors

Given the global declarations of climate emergency and public calls for sustainability, timely solutions for existing policies and practices are needed. This Special Issue of *Sustainability* aims to gather new inter- and multi-disciplinary solutions to the challenges of sustainable public procurement, sustainable corporate behavior, and sustainable changes to higher education curricula. As timely actions require coherent sustainability policies, this Special Issue aims to gather the newest sustainable developments in three distinct but correlated sectors:

1. Sustainable public procurement
2. Sustainable corporate practices
3. Sustainable changes to higher education curricula
