### Message from the Guest Editors

Dear Colleagues,

Cities are transforming, and the Smart City concept has become a reality. Among the areas that affect the Smart City are energy, efficiency and infrastructure. Energy is interesting in the city, as renewable energy sources can be integrated into cities in a simple way. Energy efficiency is a vital process in all areas of science, so the city must integrate highly efficient systems and processes.

Therefore, this Special Issue expects papers that are based on the topics mentioned above, which can be systematically summarized as follows:

- Energetic efficiency and sustainability;
- Infrastructures, energy and the environment;
- Mobility and IoT;
- Governance and citizenship.

Deadline for manuscript submissions:

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.
