Deadline for manuscript submissions:

closed (30 September 2021)

Message from the Guest Editors

The research shows that the applications and uses of Building Information Modelling (BIM) across planning, design and construction of built assets have received a significant attention over the last two decades. Studies have addressed themes related to visualization and virtual reality; information exchange and interoperability; semantic enrichment and information retrieval; cloud computing and Semantic Web, among several other themes.

This special issue targets up-to-date modelling, analysis, computation and synthesis approaches with a particular focus on BIM-integrated facility management, big data, Industry 4.0 and real-time managerial frameworks, sustainable and predictive maintenance of architectural, engineering and construction projects. Studies of theoretical, empirical, and experimental nature along with case studies on the description of real-life projects are welcome. Of particular interest are multidisciplinary research studies involving industry practitioners, built environment experts and facility managers that provide rigorous BIM uses on real-life facility management projects.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
