## Circular Economy and Artificial Intelligence

Guest Editors:

### **Dr. Hamid Khayyam**

Department of Mechanical and Automotive Engineering, School of Engineering, RMIT University, Melbourne, VIC 3083, Australia

### **Prof. Dr. Seeram Ramakrishna**

Department of Mechanical Engineering, National University of Singapore, Singapore 119077, Singapore

Deadline for manuscript submissions:

**closed (8 March 2024)**

### **Message from the Guest Editors**

In order to guide companies and academia toward the principles of the circular economy, this Special Issue aims to be a leading peer-reviewed platform and survey of the state-of-the-art in order to grow and promote a systematic approach to the circular economy as the only path to be competitive. However, to implement this goal, it is necessary to change the traditional approach to a new environmentally-friendly reduce, reuse, and recycle (RRR) economy enabled by artificial intelligence technologies. The Special Issue covers research on system and process analysis, modelling, prediction, and optimization to improve RRR. In addition, papers are welcome on other related topics, such as renewable energy, electricity supply and demand, bioenergy, robots, sensors, machine learning, data analytics, materials passports, life cycle assessment, life cycle costing, decarbonization, ESG (environmental, social, and governance factors), vehicles, energy storage, energy conservation, and energy in buildings (industrial and residential) within the context of broader automation control and energy efficiency.

# Special Issue

an Open Access Journal by MDPI

## Editor-in-Chief

### **Prof. Dr. Marc A. Rosen**

Faculty of Engineering and  
Applied Science, University of  
Ontario Institute of Technology,  
Oshawa, ON L1G 0C5, Canada

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
