Message from the Guest Editors

In our increasingly globalized society, intercultural and traditional activities are becoming more and more intertwined on a daily basis. Meanwhile, a large part of the population is not educated in current issues related to sustainable development, and that this is essential for the development of citizens and professionals who are scientifically competent to deal with environmental threats to sustainability. The use of technology in education can help the promotion of intercultural education and sustainability.

Quality, today, is generally considered a somewhat hollow term that requires a definition which is consistent with other concepts such as continuous improvement, excellence in performance, user satisfaction, etc. That is why a broad knowledge of the world in which we develop, focused on intercultural education and promoting sustainability as an improvement in educational quality, with a focus on technological progress, is currently the axis of development of the future citizenship that will shape our society.

Special Issue

Editor-in-Chief

Prof. Dr. Steve W. Lyon
School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
