Message from the Guest Editors

At the present time, the advent of the “new knowledge economy” has led to consider knowledge as one of the most important organizational and strategic resources to develop sustainable competitive advantages and obtain superior organizational performance and economic growth. Knowledge management (KM) can be broadly defined as the process of creating, using, sharing, storing, and managing knowledge and information within and between organizations to achieve their objectives, thus facilitating decision-making.

For this Special Issue of Sustainability, we invite submissions focused on new trends and challenges about the role of KM in organizations. Potential contributions may include, but should not be limited to, theoretical papers and/or quantitative studies. Papers that provide new empirical evidence from case studies are also welcome.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
