Message from the Guest Editor

This Special Issue will focus on the constraints and opportunities around disaster-related legislation and regulatory requirements for sustainable reconstruction programmes after disasters. Literature suggests that legislation and regulatory requirements can significantly influence the rate of recovery from natural disasters. The expectation is that these facilitate reconstruction and are enabling of recovery, while also future-proofing against disaster events. However, very often, legislation and regulatory requirements are not appropriate and are inimical to post-disaster reconstruction objectives for increased resilience and reduction in vulnerabilities. This Special Issue provides a platform for an increased understanding of the considerations that should be given to the peculiarities of post-disaster reconstruction programmes within legislation. It is intended to feature a collection of papers on lessons learnt from the review and/or revision of disaster-related legislation in different jurisdictions so that they serve as best practices for future more sustainable reconstruction programmes in the aftermath of natural disasters.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
