### Message from the Guest Editors

Dear Colleagues,

A holistic approach in management systems is conditioned not only by their uniform structure but especially by effective risk management, especially those that are important for the sustainability of the organization's business. Risks can negatively affect the quality of products/projects and provided services. Requirements for the introduction of fully automated and digital workplaces can, on the one hand, reduce existing, long-known risks, but on the other hand they can create new hazards, which together with changing external threats create a negative impact on future development and sustainability.

The overall intention of this Special Issue is to underline the problem of risk management in new and changing conditions and to see and promote new methods and tools. The scope focuses on research dealing with (but not exclusively):

- Management systems and their new structures in changing and business conditions.
- External threats and their impact on sustainability development.
- Proactive approaches in risk management.
- New design principles in digital management.
- New methods and techniques used in project management.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
