Deadline for manuscript submissions:

31 August 2021

Message from the Guest Editors

Today, there are many opportunities for useful reduction and recovery of materials that would otherwise be destined for disposal or landfill.

From a legislative point of view, governments and institutions can take responsibility for the efficient disposal of waste, as well as promoting public and industry awareness of disposal issues and subsequently ensuring a stable business environment for waste collection, treatment, and reuse. The industry can create opportunities for manufacturing companies by returning waste back to manufacturing processes through the application of reverse logistics to the enterprises.

This Special Issue is focused on solving problems around:

- Waste after/from the manufacturing process;
- 3R objectives (reduce–recover–recycle);
- Applications of new materials into the industry;
- Reverse logistics;
- Circular economy principles.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
