Message from the Guest Editors

Traditionally, architects search for resources and technology to select and apply state-of-the-art materials as well as conventionally used materials for their building designs. However, the understanding of the sustainability issue has transformed the whole paradigm of architectural materials from a simple assembly of multiple commercially available building materials and products to a holistically curated wide collection and system of materials. Although the politically and socially normative concept of sustainability limits material interests to a prescribed range of standardized and authenticated building materials, creative architects and researchers who reject common practice have attempted to challenge the definition of sustainability in architectural materials. Now, we need to expand the scope of the controversy surrounding architectural materials.

We would like to gain insights into the interpretation of aliveness in architectural materials by architects, designers, engineers, and researchers in the pursuit of sustainability from various experiments, studies, and reviews.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
