Message from the Guest Editors

According to World Urbanization Prospects: The 2018 Revision of the UN Population Division, there are only 1595 cities in the world with more than 300,000 inhabitants, which house 56% of the world urban population. However, most academic research and analyses by international institutions have focused on the world's largest urban and metropolitan areas. This rather restrictive approach largely ignores and underestimates the huge diversity of urban phenomena. This Special Issue will focus on medium-sized cities and their capacity to organize external urban areas, which spatially express the tremendous urban diversity within each territorial context. This Special Issue seeks to collect comparative studies of groups of medium-sized cities, conducted at the regional, national, and continental scales in developed countries. The aim of this Special Issue is to identify relatively recent dynamics and the most sustainable processes of change and urban strategies, thereby confronting the challenges presented by the new urban agenda of the 21st century.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
