Message from the Guest Editors

Dear Colleagues,

In recent times, the presence of micro(nano)plastics (MNPs) in drinking water and wastewater treatment plants (WWTPs) has caused growing concerns about the integrity of treated water's quality. Although micro(nano)plastics have broad but small sizes and diverse chemical compositions, recent research on detecting and removing them via water treatment or purification techniques is still evolving. Microplastics can be formed from the breakdown and weathering of macro(meso)plastics (secondary microplastics) or as a result of the direct discharge of primary microplastic items such as fibers, microbeads, and nurdles.

This Special Issue aims to compile recent original research papers, reviews, perspectives and minireviews focused on furthering our understanding of the occurrence, fate, and distribution of micro(nano)plastics during wastewater treatment process, as well as the quantification of micro(nano)plastics removal efficiency by alternative purification technologies, will be considered.

We look forward to receiving your contributions.

Prof. Dr. Nsikak Benson

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
