Message from the Guest Editors

We invite both conceptual and (qualitative and quantitative) empirical articles, as well as literature review and meta-analysis articles from various fields, including not only business and management but also sociology, political science, psychology, economics, economic geography, and so on. Examples of relevant topics include but are not limited to:

- How do EMNEs shape sustainable development and related innovations in home and host countries through sustainability and innovative solutions? What are their similarities and/or differences from advanced market MNEs?
- What are the challenges versus opportunities of these EMNEs to deal with the unique political, cultural, religious, and commercial environments in their home and host countries for achieving their sustainability and innovation goals?
- What are the repercussions for the contextual effects on these EMNEs' sustainability and innovative solutions, especially for country of origin and domicile pressures in home and host countries?

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
