Message from the Guest Editors

Dear Colleagues,

The growth of cities is defying urban developers and decision makers, and changes in the future climate conditions are making cities more vulnerable. Resilient adaptive measures include nature-based solutions (NBS) that provide additional ecosystem services when implemented at a large scale. NBS are developed upon the understanding of nature and natural processes, fostering the preservation of ecosystems integrity, improvement of their sustainable management, and creation of new ecosystems.

This Special Issue should cover the following items:

- Innovative NBS
- Calculation of direct and indirect benefits
- Long-term impacts
- Life cycle costing of NBS
- Innovation in valuation techniques (CBA)
- Incentives and financing of NBS

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many other databases.

Journal Rank: [JCR - Q2 \(Environmental Studies\)](#) / [CiteScore - Q1 \(Geography, Planning and Development\)](#)
