### Message from the Guest Editors

This Special Issue intends to deepen the knowledge of in situ and ex situ nature conservation and its implications for sustainability. It is devoted to a wide spectrum of organisms from microorganisms and fungi to higher plants and animals, as well as to varied levels of biological organizations from individuals and populations through ecosystems and landscapes to biomes and biosphere.

Contributors from different fields are invited to submit their articles on topics including (but not limited to):

- biodiversity conservation on any spatial scale (local, regional, or global) and temporal scale;
- current and projected consequences of anthropogenic transformations of habitats and ecosystems;
- innovations and good practices in nature conservation;
- management of protected areas;
- ecological restoration.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
