31 October 2021

Message from the Guest Editors

This Special Issue focuses on how interventions based on organizational development and occupational health can contribute to create decent work and improve the quality of life at work. This is particularly relevant under the current context, in which the COVID-19 pandemic and the ongoing threat of an economic crisis and global recession may result in job losses and an impoverishment of working conditions. On the other hand, the recovery from the COVID-19 outbreak may entail the opportunity to develop a different economy, tracking a more sustainable, inclusive, and healthy path.

We welcome original research papers, brief reports, and reviews from different disciplines (e.g., psychology, sociology, economics, management, engineering, public health, etc.) or an interdisciplinary focuses on factors and measures to develop organizations and societies that (a) provide stable employment and self-employment with decent working conditions; (b) promote more inclusive working environments; (c) offer meaningful and more participative jobs within a social responsible strategy of the organization; (d) improve personal competences and social growth.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
