30 July 2021

Message from the Guest Editors

Food security and the preservation of living resources are becoming paramount concerns for scientists, politicians, and administrative decision-makers worldwide, as well as for every sensible inhabitant of the planet. Agriculture has a huge impact on the environment, increasing in parallel with the increase of the global population, with its negative contribution to climate change, deforestation, water scarcity, land degradation, pollution, the salinization of irrigated farmland, desertification, greenhouse gas emissions, the reduction of biodiversity and other unfavorable effects.

This Special Issue focuses on the desired, efficient and optimum conservation and utilization of plant genetic resources to develop environmentally friendly sustainable agriculture in the coming years. Therefore, in this Special Issue, we expect contributions related to the conservation of germplasm, genetic enhancement, plant breeding and the management of plant resources, agricultural practices and technical improvements oriented to the promotion of sustainable, ecological agriculture, with beneficial consequences for the environment, human health and the future of the planet.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:—free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed by the [Science Citation Index Expanded](#) and [Social Sciences Citation Index](#) (Web of Science), as well as [Scopus](#) and [other databases](#).

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 14.5 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2020).
