submissions:  
**closed (31 October 2020)**

### Message from the Guest Editor

In all aspects of governing for a sustainable future, (scientific) knowledge and expertise are at the core. This is especially so when it comes to governing environmental problems which are dependent on science to be defined and explained. With the growing number of socially and technologically generated environmental risks, individuals and organizations need to relate to and make use of complex information and knowledge in their decision-making. Thus it is of great importance to explore and explain the processes that precede the (scientific) knowledge and expertise that we heavily depend on in environmental governance.

This Special Issue of Sustainability addresses these questions by focusing on the relation between knowledge production and environmental governance at all levels. Together, the contributions explore how this relation is manifested and how it plays out at these different levels of society as well as how the different levels influence one another. This exploration of knowledge, expertise, and environmental governance includes questions on the relation between knowledge producers, knowledge systems, and social spheres, such as science, policy, and publics.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
