Message from the Guest Editors

Environmental issues are at the center of social concerns because of their effects on human health and well-being. The relationship between individuals and their environment is becoming an object of interest for the sciences, and particularly for psychology.

The need to reduce the impact of human activity on the climate is one of the main pillars in facing the current climate and environmental challenges. In this sense, we take an interest in environmental concerns and the implementation of eco-responsible behaviour. A number of psychological dimensions have been identified in the environmental psychology literature to explain the implementation of pro-environment behaviours. We are particularly interested in the role played by a fundamental psychological dimension, that is, connection with Nature, as a variable that facilitates a particular experience with the environment, generating concern about its state and providing an increase in psychological well-being.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
