Toward Sustainability: Reliable Transportation Network Design and Analysis

Message from the Guest Editors

Transportation networks consist of a wide variety of critical infrastructure elements that help provide interconnectivity for complex social, economic and political systems. From air transport hubs, to key rail corridors and interstate highways, maintaining operational continuity and ensuring system resilience and sustainability is essential for the day-to-day functioning of society. The purpose of this Special Issue is to provide a collection of original research papers that consider these challenges. Of particular interest are contributions that detail innovative assessment and analysis methods (e.g., spatial analytics, location modeling, spatial optimization, game theory, data envelopment analysis, machine learning, artificial intelligence, geocomputation, simulation etc.) for developing reliable network designs, evaluating network survivability and vulnerability, and improving resilience, robustness, continuity, recovery, and restoration.

Deadline for manuscript submissions:
15 September 2019
Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded and Social Sciences Citation Index (Web of Science), as well as Scopus and other databases.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 4.9 days (median values for papers published in this journal in the second half of 2018).
