**closed (15 January 2022)**

### Message from the Guest Editors

Dear Colleagues,

Socially and environmentally responsible investing is becoming the benchmark in financial markets for several reasons. First, due to the emergence of climate change and global warming, and the lack of a global benevolent planner enforcing a system of emission caps across sovereign countries, corporations are increasingly asked by the public opinion and, consequently, investors to take responsibility for internalizing the environmental externalities of their activities. Second, recent research has identified exposure to ESG (environment, social, governance) risk as an independent risk factor to which financial assets are exposed. Conflicts with stakeholders, civil society, and expectations of future more severe regulation contribute to increase the importance of this risk factor.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
