Message from the Guest Editors

Dear Colleagues,

The objective of this Special Issue is to elicit papers related to sustainable risk assessment and disaster management topics. It aims to encourage a perspective of sustainability in dealing with disaster management. Strategies, methods, and technologies for mitigating, preparing, responding, and recovering from various kinds of disasters (including natural and technological/man made) are needed in order to achieve the goal of sustainability and sustainable development and at the same time enhance our disaster management practices. Besides covering the main issues of sustainable risk assessment and disaster management, other areas covered include disaster management sustainability, sustainable risk assessment of natural or technological disasters, risk assessment of disaster management policies and regulations, disaster management governance and sustainability, general disaster management risk assessment, and other related topics.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
