submissions:

**1 December 2021**

### Message from the Guest Editor

Risk theory provides the mathematical background for sustainable insurance businesses. Furthermore, insurance represents a tool for the stabilization of the market and the preservation of the economic equilibrium. These two links are the focus of this Special Issue, and represent a contemporary approach towards the determination of the prerequisites for economic stability.

The case of large claims is very interesting as a major reason for insurance instability, and the manipulation of such claims plays a crucial role in the operation of the insurance system. The optimization of the reserves and premiums is also relevant. Numerical and analytical methods can be very useful.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

**Journal Rank:** [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
