Deadline for manuscript  
submissions:

**closed (10 April 2021)**

### Message from the Guest Editors

Since the environmental, social, and economic sustainability is a strong driver for the development and implementation of sychromodal solutions, all the business strategies, the planification, and the optimization of classical logistics operations should be all redefined and studied under this perspective. Hence, this Special Issue mainly focuses on presenting new developments and scientific works from different fields (e.g., operations research, operation management, transportation engineering, ICT) that can provide innovative contributions in the sustainable adoption of logistics solutions taking into account specific aspects regarding sychromodality (e.g., flow synchronization, dynamic and real-time optimization, LSP integration and cooperation, a-modal booking, etc.).

Applied Science, University of  
Ontario Institute of Technology,  
Oshawa, ON L1G 0C5, Canada

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
