Message from the Guest Editors

Dear Colleagues,

Smart cities aim at improving the quality of life of citizens by accounting for environmental sustainability. However, the increasing complexity and interrelationships of smart city services pose several issues on smart city resilience that are among the challenges of current research. Artificial Intelligence (AI) techniques are used indeed to improve the methods and tools devoted to collecting and analyzing citizens' opinions, sensing people behaviors, organizing knowledge, predicting and forecasting consequences of hazardous events. However, other than enabling and facilitating these activities, AI is also transforming the way people live.

The goal of this special issue is to stimulate the debate on both AI applications and impacts for smart cities. The intent is to provide a deep account for novel and disruptive AI approaches to smart city innovation and resilience of urban areas and communities. Focus on resilience of AI systems themselves is also appreciated. Furthermore, the special issue welcome visionary papers related to AI safety and social aspects like handover and human-machine communication.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
