Message from the Guest Editor

Dear Colleagues,

Rapid population growth along with the development of large infrastructure projects will impact the sustainability of cities and regions in the Global South. The challenges of implementation of spatial planning have evolved in those cities due to planning paradigm shift, democratization, and decentralization, the rise of information and communication technology, and global environmental crisis. In response to those challenges, some cities have implemented some modifications and innovations in the plan-making, plan implementation and development strategies. We invite abstracts that address a broad range of issues pertaining to spatial planning in the Global South—including, but not limited to:

- processes and roles of spatial planning and master plans in shaping the future of cities
- evolution and challenges of spatial planning and master plans
- spatial development frameworks in response to global environmental crisis
- review of plan-making, plan implementation and development strategies
- power dynamics between local government and local community
- key innovations and development strategies in response to global pandemic

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
