### Message from the Guest Editors

We are currently living in a situation of uncertainty and crisis. The sport sector has been especially influenced by the COVID-19 crisis, so there is an urgent need for the majority of sport enterprises to act entrepreneurially to face this change (Ratten, 2020). The competitive environment and the necessary differentiation of organizations arising from the recent crisis have made entrepreneurship a field of study of growing interest. According to Murphy, Liao, and Welsch (2006), entrepreneurial organizations are key to economic growth in the market system, and the sports sector is no stranger to this. With this panorama, some governments are taking an active role as promoters of an entrepreneurial culture in different contexts, giving entrepreneurship a fundamental value for the economic development of societies and the improvement of the wellbeing and personal fulfillment of citizens. Therefore, entrepreneurship is a new field of research that is progressively attracting more attention among researchers and relevant institutions and organizations in the international arena.
