With the emergence of Industry 4.0 and related concepts, industrial companies seem to be adopting a new approach to produce fast, customized materials and, simultaneously, addressing the highest quality standards. Hence, a new management approach should be implemented too. This Special Issue aims to address the challenges faced by the ISO management systems in the context of Industry 4.0 and related concepts. Additionally, this Special Issue intends to promote the discussion on which strategies are the most suitable to cope with these new challenges.

Hence, this Special Issue asks for relevant research and review papers in topics that include but are not limited to the following:

- Standardized Management Systems
- Risk-based Thinking
- Standardized Management Systems and Supply Chain Management (SCM)
- ISO 9001, ISO 14001, ISO 9001, and ISO 22000 in the context of Industry 4.0
- Information Security within Standardized Management Systems
- Quality Management 4.0
- The Profile of the Management System Team in the 21st Century
- New Tools and Methods to improve IMSS Effectiveness and Efficiency
