### Message from the Guest Editor

Dear Colleagues,

The image of a modern supply chain has become inseparably associated with its care for ecological aspects and sustainable development. It can be assumed that the pursuit of sustainable supply chain management results from the needs of the modern world, and efficiency and care for natural resources contribute not only to improving its image but also to waste reduction, innovation, generating profits, and building a competitive advantage.

Considering the above, this Special Issue looks for outstanding research and development results, case studies, and review papers in topics that include but are not limited to the following:

- Sustainability in supply chain management;
- Drivers and barriers SSCM;
- UN SDGs;
- Risk management in the SSCM;
- Models of SSCM;
- Management systems and improving SSCM;
- ISO 14001, ISO 9001, and ISO 22000;
- Green supply chain management;
- Environmental management;
- Social responsibility.

Thank you for your contributions.
