Message from the Guest Editors

Dear Colleagues,

The importance of materials in enhancing the sustainable performance of structures and other engineering products goes without saying. This makes it paramount to develop new materials that score better in sustainability performance and enhance the properties of existing materials to realize the same goal.

To support the research effort in the field of sustainable materials, we are launching a Special Issue of Sustainability, “Sustainable and smart materials for future construction,” that aims to shed light on the ongoing scientific efforts dedicated to the development, improvement, and testing of sustainable materials for the construction industry.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
