Message from the Guest Editors

Dear Colleagues,

To sustain the development of maritime transportation, “sustainable maritime,” which operates with a good balance between environmental impact and economic interests, have been the focus of marine industries and government agencies and are required to look into energy saving and reducing the impact of their operations on society and the environment. The possible research topics of this Special Issue include but are not limited to:

- Sustainable maritime transportation planning and management;
- Sustainable maritime network or fleet optimization;
- Optimization models for port and shipping operations;
- Revenue/yield management of maritime transportation;
- Innovations for sustainability issues with emerging technologies;
- Environmental issues in maritime industry;
- Sustainable maritime transportation and competitive advantages;
- Managing sustainability through collaboration and coordination;
- Economic analysis of sustainable maritime transportation;
- Researches for the future era of automatic shipping and ports.
