Deadline for manuscript  
submissions:  
**closed (5 January 2023)**

### Message from the Guest Editors

We are living in a world that is characterized by rapid urbanization, resulting in different patterns of land-use changes in different countries and regions. Highly diverse and intensive anthropogenic activities have thereupon aroused the reorganization of the urban landscape in the form of either sprawl or compact land use patterns. In either form, it has been common to see irrational land uses, which have carried burdens in natural resources and environment and caused eco-environmental problems.

This Special Issue seeks to compile literature regarding contemporary urban planning and land use in different areas from a wide range of disciplines, with an aim of contributing to the global challenge of sustainable urban development. Original and innovative scholarly papers that address the simultaneous processes/spatial transformation of urban planning and land use are wanted, preferably for making use of state-of-the-art spatial technologies, such as remote sensing, GIS, big data, and social networks. Planning approaches and policy analyses are also welcomed since authorities and governance modes play a vital role in evolutions of urban planning and land uses across the world.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
