submissions:

31 December 2021

Message from the Guest Editor

This Special Issue focus on research examining the application of various business models to support sustainable development goals (SDGs). This special issue provides a platform for theory-based research, conceptualization, and case studies in order to broaden and accelerate our understanding of innovative sustainable business models and sustainable development goals. We encourage submissions by academics and practitioners that examine the application of innovative business models designed to promote sustainable development by organizations. This includes an examination of the internal and external challenges faced in this process. Submissions are welcomed that examine this domain from theoretical perspectives, consolidate existing theories and/or test methodologies that contribute to this field of knowledge. This can include conceptual and empirical studies using quantitative or qualitative analysis, studies with a special interest on using different levels and units of analysis, and specific case studies of organizations that have focused on specific area(s) or ways to promote sustainability (e.g. environmental, health, natural resources, or climate change issues).

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
