### Message from the Guest Editors

This volume aims to include works and research that address issues regarding the sustainability of the public health system and of the pharmaceutical system (which includes both state and private pharmacies), respectively the health of the environment, possibly with correlations between the three mentioned above. Therefore, this Special Issue focuses on two of the particular sustainable aspects of the "One health" concept, recognizing that the health of people is connected to the health of the environment.

Deadline for manuscript  
submissions:

**31 October 2021**

an Open Access Journal by MDPI
