Message from the Guest Editors

Sustainable Smart Cities and Artificial Intelligence offer an intensive evaluation of how sustainable Smart City establishments are made at different scales through automated means of thinking, for instance, geospatial information, data examination, data portrayal, clever related things, and quick natural frameworks handiness. Progress in electronic thinking brings us closer to making a consistently reproducible model of human-made and trademark structures, from urban regions and transportation establishments to utility frameworks. This continuous living model empowers us to manage and improve these working structures, making them dynamically observant. Smart Cities and Artificial Intelligence provide a multidisciplinary procedure, using speculative and applied pieces of information, for the evaluation of Smart City applications.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
