### Message from the Guest Editors

Productive sectors have traditionally followed a linear pattern based on design–production–use–waste. Circular economy has emerged as an alternative model that converts waste into new resources that may be incorporated into the production cycle as raw materials. The urgency of closing materials loops has been fostered by a consortium of global actors.

In light of this, the implementation of indicators for circular economy is necessary to assess the enhancement obtained regarding efficiency in the use of resources and the minimization of waste generation. Consequently, decision-makers from both the production sector and public administration could incorporate these indicators into their working models and contribute to a sustainable and resource-efficient management.

Thus, this Special Issue aims to widen the knowledge about the implementation of sustainable technologies for the transition towards a circular economy model, which will lead to sustainable production focused on biosphere conservation by reducing the resources escaping from the process.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

**Journal Rank:** [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
