### Message from the Guest Editor

The objective of this Special Issue is to showcase scientific research, work and experiences capable of providing a deeper understanding of sustainability issues in urban greenery, using multidisciplinary and innovative solutions at ecological, social and economic levels in order to meet contemporary urban needs. The collaboration of a wide range of disciplines and organisations interested in urban areas, including local governments, will make it possible to translate scientific knowledge into practice, obtaining significant economic benefits and improving the quality of life required by urban dwellers.
