Message from the Guest Editors

Dear Colleagues,

This Special Issue intends to bring together new and emerging interdisciplinary research that explores current trajectories, practices and drivers of sustainable and inclusive transport and land use development in growing cities in Latin America and the Caribbean, Africa and South-East Asia. In a context of rapid urbanisation and economic growth, increasing access to new technologies, and shifts in paradigms of individual and collective mobility, new challenges and opportunities are emerging for global south cities in relation to how to plan, govern and regulate urban transport systems. Such challenges represent a new area of research on sustainable mobility, requiring new conceptual and methodological developments, as well as yielding new empirical evidence of new travel behaviours, perceptions and priorities of increasingly connected citizens and the potential social consequences of inequalities in terms of access to new transport alternatives and technologies.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:—free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed by the [Science Citation Index Expanded](#) and [Social Sciences Citation Index](#) (Web of Science), as well as [Scopus](#) and [other databases](#).

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 14.5 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2020).
