### Message from the Guest Editors

This special issue aims to capture the novel proposals for achieving restructured, resilient and sustainable cities, based on, for example, energy sovereignty, low carbon emission systems and circular economy. We would like to open a discussion in analyzing the following: current existing low impact exemplary cities, pathways to 1.5 degree warming compatible living, theoretical modelling of energy-efficient urban environments, and simulations of sustainable urban environments and their dialog with other areas. Also, contributions to contemporary urban sustainability concepts discussing the relationships and interdependency between different sustainability aspects, especially ecological and social, are welcomed.

Deadline for manuscript  
submissions:

**30 September 2021**

Applied Science, University of  
Ontario Institute of Technology,  
Oshawa, ON L1G 0C5, Canada

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

**Journal Rank:** [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
