Message from the Guest Editor

Dear Colleagues,

Beyond an “environmental impact assessment” approach, the issue to define effective metrics and methods in order to perform the assessment of territorial transformations represents an incomplete contribution of territorial sciences to policy making processes at any territorial scale. The ambition to identify “the best” methodology or “the best” set of indicators, relevant for any specific field of application, is far from being intended as an objective to be reached. However, the effort to perform robust case study applications oriented toward delivering project assessment through the elicitation of effects produced in the territorial dimension, benchmarking sustainability principles adopted under international agreements, represents a challenging interdisciplinary research domain.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
