Message from the Guest Editors

Dear Colleagues,

In 2020, the tourism sector has been one of the most affected by the ongoing COVID-19 pandemic, preventing individuals from traveling and getting out of their ordinary daily life. How can we learn from the COVID-19 crisis to put in place more sustainable tourism strategies? What can be done to overcome this pandemic and contribute to the sustainability of destinations? Why is a sustainable solution so hard to achieve in the tourism industry? What can be the role of circular economy in this process? What role can less massified tourism segments take in the establishment of a new tourist path? Can pandemics put an end to massified tourism models? Can we face the emergence of new trends where domestic tourism will play a larger role in tourist development strategies? What is the role of different stakeholders (e.g., politicians, residents, tourists) in tourism strategies aiming to prevent and overcome pandemic scenarios? What about the role played by technologies such as Geographical Information Systems (GIS), Webmapping, Augmented Reality, and others? What is the potential of big data in the management of this kind of crisis and overcoming it?

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
