Message from the Guest Editor

Dear Colleagues,

Blue Economy (BE) has been increasingly promoted and pursued globally, regionally and nationally as a contributor to sustainable development. A BE refers to any economic activity located or depending on marine and coastal areas and environments and entails traditional sectors and emergent ones. Lately, the need for estimating the size of a BE as well as for monitoring assessing the progress of BE towards Sustainable Blue Growth (SBG) is promoted by related policies and strategies, and it is a topic that has attracted the interest of the research community from a variety of disciplinary backgrounds. However, there are various challenges that are linked to these kinds of estimations and assessments.

This Special Issue aspires to cover topics such as:

- a) The status of BE at various scales (sectoral, national, regional, etc.) ;
- b) Assessment challenges that may be covered by reviews and comparisons of methods to assess progress towards SBG and identifications of pros and cons;
- c) The contribution to the ongoing discussion on what SBG is and what the requirements are for BE sectors in order to contribute to SBG.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
