Deadline for manuscript
submissions:

30 November 2021

Message from the Guest Editors

The Tropics is home to nearly half the world's population, has rapid population growth forecast, and significant economic and social inequality challenges. While tropical environments are urbanising faster and faster, they are often unable to cope with the transformations brought by this rapid change. More discourse on sustainable tropical urbanism is needed to understand the driving forces of contemporary tropical cities and raise awareness of the strategic role that urban planning and design play in our society. How to build urban tropical resilience and deal against natural disasters and climate change related impacts? How to reduce vulnerability of fast urbanising environments? What are the best sustainable urbanism practices that can be shared and implemented to shape the tropical built environment? We welcome contributions from academic researchers, practicing planners and architects, public artists, local government officers, students and anyone interested in understanding tropical cities. Themes include but are not limited to: building tropical resilience; creation/curation of tropical space and place and methods for tropical urban research and professional projects.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:—free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed by the [Science Citation Index Expanded](#) and [Social Sciences Citation Index](#) (Web of Science), as well as [Scopus](#) and [other databases](#).

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 14.5 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2020).
