Message from the Guest Editors

Dear Colleagues,

Nowadays, urban areas need to face immense a wide range of challenges related to climate change adaptation, sustainable waste management, affordable, reliable and modern energy and sustainable transport and mobility. The concept of 'smart cities' is an adequate response in addressing these challenges. Smart City 3.0 concept is the framework in which global challenges can be anticipated, defined and managed so that urban sustainability can be achieved and preserved in the context of climate change.

The main aim of this special issue is to understand how the smart city concept affect the strategies and practices in sustainable urban planning within climate change framework.

This topic will be of interest to scholars who deal with smart and sustainable cities, urban governance and policy-making, transformational cities, urban planning management, climate changes, urban sustainability, urban land-use, as well as managing the synergies and trade-offs these concepts and not only.

We look forward to receiving your contributions.

Dr. Rares Halbac-Cotoara-Zamfir

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPus](#) / [SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
