Message from the Guest Editor

This Special Issue calls for contributions from multiple methodological approaches and theoretical perspectives of relevance for studies of global, world, or planetary urbanization. Submissions may include but should not be limited to the following topics: infrastructures of global connectivity and their impacts on socio-ecological systems; territorial development models and their urban dynamics; greening urban globalization and the role of nature-based solutions in global urban policy; socio-ecological movements in global city-regions; more-than-human politics of difference in peri-urban hinterlands; cartographic innovations on peri-urban development; innovative approaches to defining and measuring multidimensional urban footprints.

- planetary urbanization
- infrastructure-led development
- urbanization and socio-ecological systems
- comparative global urbanisms
