Message from the Guest Editors

Dear Colleagues,

The recent eclosion of a great variety of affordable and accessible media equipment and digital applications, as well as methodologies and approaches, has enabled new types of knowledge, especially in science. This Special Issue will cover how visual technologies can add, improve, or assess the sustainability of digital products, experiences, and environments, considering a wide range of variables and indicators.

The “Visual Technologies for Sustainable Digital Environments” Special Issue will address a broad range of topics that should help readers, researchers, teachers, and professionals to understand both generic and specific approaches related with the representation of digital data and spaces with a large range of visual technologies, such as virtual or augmented reality, serious games, mobile devices, artificial intelligence, haptic devices, etc.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
