Deadline for manuscript  
submissions:

**closed (31 December 2023)**

### Message from the Guest Editors

Nature-based solutions (NBS) are inspired and supported by insights gained from ecosystems and nature. These solutions can enhance water quality, improve water availability, and reduce risks associated with water-related disasters and climate change. Nevertheless, water management has been prominently dominated by traditional and man-made infrastructures, while NBS remain underexploited. Moreover, an enormous gap exists in the literature on the strategies to efficiently and effectively implement NBS. This Special Issue solicits original articles, concept papers, and critical reviews containing novel contributions providing an evidence-based assessment of the effectiveness, benefits, and drawbacks of NBS and their application in the context of the sustainable management of water resources. Papers linking NBS to the 2030 Sustainable Development Goals, ecosystem services, and climate change are particularly welcome.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
